for Asset Management.

The web-based architecture
offers **anytime, anywhere**
accessibility by users via the
Internet and Intranet.

Instantly **locate, identify and
track** your assets, eliminating
wasted time and costs spent
searching for and replacing
missing assets.

A-TRACK

The Complete Solution for Asset Management

Asset Tracking can be a difficult task, especially when you do not know where they are located.

Companies often spend too much time and effort to ensure assets are accounted for. Asset Audit exercises are often tedious, time-consuming chores; and yet the accuracy of resulting data from such activities is often questionable.

A-TRACK was designed to address these problems and provide you a solutions to your Asset Management and Tracking needs.

KEY ADVANTAGES

A-TRACK enables all Fixed Assets transactions to be captured on location. Track details such as:

- Asset Numbers, Descriptions, Serial Numbers, Vendors
- Transfers to/from locations and users
- Dates of Purchase, Cost Centres
- Warranty validity and write-off verifications

A-TRACK offers the following key advantages:

- Increased accuracy in reporting
- Easy and accurate identification of assets
- Eliminates tedious paper-and-pen processes
- Enhanced visibility of assets
- Reduced errors
- Reduced time and operational costs
- Enhanced security and control

FLEXIBLE ASSETS-TAGGING METHODS

A-TRACK interfaces with and accepts data input from two main methods of identification – Barcode and RFID. It is designed for .NET environment; therefore Asset Count can be done via common handheld devices.

MINIMUM SYSTEM REQUIREMENTS

Server

- Microsoft Windows 2000 with .Net Framework
- SQL Windows Server with SP3a
- Internet Explorer 6.0 and above
- Microsoft .Net Framework 1.1 and above

PC

- Microsoft Windows XP or newer

Handheld Device

- Microsoft Windows CE 5.0 or newer
- 128MB RAM/ 256MB ROM

INTEGRATION OPTIONS

A-TRACK functions as an independent standalone system or it can be configured to interface with your existing financial or ERP System. This means there is no need for double entry of data.

For customers that already have a desktop-based Asset Management System in place, **A-TRACK Mobile** offers you the ability to use handheld devices for your Mobile Asset Counting.
